1 OUR VISION FOR THE FUTURE

(a) Our dream of a desired future for the Swartland

During the Strategy Workshop with Council and management that was held on 23-25 November 2022, the participants were divided into five groups and given the task to write down their dream of a desired future for the Swartland. The desired future described below is a consolidation of the work of the five groups.

COMMUNITY SAFETY AND WELLBEING

We dream of a Swartland that is crime free. An area where people feel safe and don't get robbed. Where everyone can move freely without fear.

We see an area where children can safely play in streets and parks. Where they can safely walk or ride by bicycle to school. Where there is a culture of "my child is your child".

We see communities that are law-abiding. Where the causes of criminality are eradicated. Where there is an effective police force to provide the necessary protection.

We dream of a Swartland that is rich in social and cultural activities. Where all our communities live together in peace, harmony, love and compassion, taking responsibility for their actions. An environment where people respect each other, have opportunities to grow and develop and contribute to the economy.

We see a quality and affordable education system that moved beyond the traditional curriculum and can cater for the future educational needs. We see an area where proper health care is affordable and accessible for all residents.

We see open spaces, hiking trails and cycle tracks that promote an active and healthy lifestyle.

We see "Ubuntu" lived and practised by all to its fullest extent in Swartland.

ECONOMIC TRANSFORMATION

We dream of a Swartland where the economy has grown and attracted private and global investment. Where everyone has a job and where economic growth is sustained through education, skills development and entrepreneurial opportunities.

We see an abundance of vendors and entrepreneurs. No loitering and beggars on the streets. Small, medium and micro enterprises (SMME's) are mentored to be sustainable.

We see skills transfer centres in all our areas and also on-line.

QUALITY AND RELIABLE SERVICES

We dream of a Swartland where everyone has access to excellent and sustainable services. Services that are provided at affordable rates and upgraded continuously. We see innovative ideas becoming a reality and the smarter management of resources. We see a community that is prepared to be co-responsible for the state of our infrastructure.

We see an integrated transport and effective commuting network with less vehicles on our streets and therefore less traffic congestion.

A HEALTHY AND SUSTAINABLE ENVIRONMENT

We dream of a Swartland where the biodiversity and wildlife are protected. Where the skies are blue (no pollution), the air is clean (no unhealthy emissions) and the environment is green (proper environmental conservation and improved health of the environment).

We dream of a Swartland where every citizen has access to safe, secure and affordable housing. Where the government and private sector work together to ensure that there is adequate housing for all and that those who are currently living in substandard housing are provided with better options.

We see a future where informal settlements are transformed into well-planned, sustainable communities with access to clean water, sanitation, electricity, and other basic services. Where these communities are designed with input from the residents themselves to ensure that their needs and aspirations are met.

A CONNECTED AND INNOVATIVE LOCAL GOVERNMENT

We dream of a world class Swartland that is globally connected. Where technology is utilised to make life easier to communicate commute and interact. Where every home has an optic fibre connection.

We see a Municipality that embraces innovation; with enhanced connectivity and collaboration, that can contribute to a prosperous and sustainable future.

We dream of a Municipality that leverages technology to better serve the needs of the community.

We see a Swartland where the smart city concept is used to increase operational efficiency, share information with the public and improve both the quality of government services and citizen welfare.

(b) Our future Swartland

We dream of Swartland 2040 that is valued for -

- being safe, healthy and prosperous;
- providing good governance, quality services and the ease of doing business with; and
- leading in technological innovation and environmental responsibility.

(c) Vision

Swartland forward-thinking 2040 - where people can live their dreams

Swartland vooruitdenkend 2040 - waar mense hul drome kan uitleef

(d) Strategic goals

- Community safety and wellbeing
- Economic transformation
- Quality and reliable services
- A healthy and sustainable environment
- A connected and innovative local government

2 INTRODUCTION

(a) General

Area-based planning is a component to the IDP process that focuses and zooms in on communities. Settlements and wards represent communities in this sense. As wards are sometimes marked in a way that splits regions that in actuality work as a unit, Swartland decided to propose a different technique that prioritises rational geographical areas while also taking ward planning into account so that wards are not neglected. To do this, each area plan integrates a number of wards.

The following five planning areas were identified:

- North: Moorreesburg, Koringberg and Ruststasie (Wards 1 and 2)
- East: Riebeek West, Riebeek Kasteel and Ongegund (Wards 3 and 12)
- West: Darling and Yzerfontein (Wards 5 and 6)
- South: Abbotsdale, Chatsworth, Riverlands and Kalbaskraal (Wards 4 and 7)
- Central: Malmesbury (Wards 8, 9, 10 and 11 and small portions of wards 4, 7 and 12).

As such, it is a strategy for addressing integrated development planning at the sub-municipal level. As a result, five planning areas exist, each with its own Area Plan document. Four of the five layouts cover two wards each, while Malmesbury town covers four.

The significance of wards and ward committees is addressed in the second part of each Area Plan. It also includes community feedback and the outcomes of public engagements held in particular wards.

(b) Structure of document

Information is presented per town and ward when addressing planning and community participation at the local level (as mentioned in the previous paragraph).

This might be challenging since it disrupts the normal flow of analysis and community involvement towards initiatives/goals. To keep things clear, anything that can be linked to a town is in the town part, and everything that can be linked to a ward approach is in the ward section.

(c) Compilation of the area plans

The Municipality, in collaboration with the ward committees, produces the area plans. Every year, the 12 ward committees meet to establish their concerns and top 10 priorities, or to reprioritise the priorities if necessary due to changing circumstances.

Ward committees identify the primary priorities of the relevant wards in relation to the five IDP strategic goals.

The Municipality then captures the priorities established during the sessions and returns them to the individual ward committees to confirm the ten key goals mentioned in the area plan.

The area plans are finished by the end of May each year and approved by council together with the Integrated Development Plan.

(d) The IDP and Area Plans

The five area plans include the following:

- an understanding of social diversity in the community, the assets, vulnerabilities and preferences of these different social groups;
- an analysis of the services available to these groups, as well as the strengths, weaknesses, opportunities and threats facing the community;
- a consensus on priorities for the relevant wards; and
- Identification of projects for the IDP.

Area plans assist in assuring that the IDP is more focused and relevant to the needs of all communities, including the most vulnerable. Ward committees can use area plans as a methodical planning and execution tool to carry out their functions and obligations. They serve as the foundation for conversation between the Municipality and ward committees on the identification of priorities and budget requests, and ward committees will utilize them for continued monitoring and assessment throughout the year.

Area plans are an integral aspect of the IDP and contain information that is utilised to define the Municipality's long-term strategy. Yet, the material is detailed and not repeated in the IDP.

3 SUMMARY OF DEMOGRAPHIC DATA

The information in the section was obtained from the Western Cape Government's 2024 Socio-economic Profile (SEP) Report and Census 2022.

4 TOWNS IN THE AREA

(a) Malmesbury

Historical Background

In 1661 an expedition was undertaken, under the guidance of Jan Wintervogel, in the direction of Malmesbury. The area was named “Het Swartland”, with reference to the Renosterbos, which appear black during warm summer months. Malmesbury originated in 1743 in the wide Dieprivier valley, around the mineral resources and fountains in the area. One of the old wells is still displayed in an old furniture store near the Dutch Reformed Church. The town was officially proclaimed on 21 May 1827 and in 1829 named Malmesbury by the Governor of the Cape, Sir Lowry Cole, who named it after his father-in-law, the first Count of Malmesbury in England. In 1860, the town obtained municipal status.

Development Perspective

Malmesbury fulfils an important urban niche in the region as well as the province. The main contributors to this general standing are institutional and commercial services, as well as the town’s market potential because of its location close to the Cape Town Metropolitan area.

Entrepreneurs have already demonstrated confidence in the economy of the town in the form of investment activities. The town’s transportation infrastructure, economic sector and human resources further contribute to this position. The human needs index has a ‘low’ rating (ranked 28th), which means that the town’s residents are in general well off relative to the provincial norm. Overall, this development profile demonstrates a well-balanced and positive image for sustained urban growth. Malmesbury presents itself as a possible “leader town” for regional development on a wider scale in the province (Growth potential of towns in the Western Cape, 2005)

Malmesbury’s development potential is strengthened by its diversified character that contributes to its success as a regional urban centre. This potential is further supplemented by administrative and manufacturing functions as the economic base. The powerful position of the indicators measuring human resources, transportation, institutional services, commercial services, economic sectors and market potential indicate a sound confidence level for further economic development and private entrepreneurship. Being the administrative seat of the Swartland Municipality, it already serves as a regional service centre for a wider area.

The urban economy is in a strong growth phase. Its high development potential can be attributed to factors such as its relative accessibility along the N7 road/rail corridor, a diversified economic base that not only accommodates agriculture, but also well-developed industrial and commercial sectors, as well as supportive infrastructure.

As a result of the high property values in the Metropole and the attraction of a tranquil rural atmosphere, there is a revival in the property market in Malmesbury. People settle here and commute on a daily basis to their work in Cape Town. The town has sufficient land for future residential and other development projects. Densification within the demarcated urban edge should still take place at a faster rate. The confidence in the local economy is supported by the existence of international companies and a large number of national companies. A number of provincial and national departments

have also been established here. Growth potential can further be stimulated by increasing the accessibility to the West Coast development corridor. The urban future of Malmesbury appears to be favourable for sustainable growth.

(b) Service backlogs

WARDS 8, 9, 10 AND 11

MALMESBURY

Sewerage

- Localised frequent blockages in the sewer collection system.
- Obsolete infrastructure causing regular blockages
- Upgrading of distribution network is needed
- Upgrading of main connectors in Voortrekker Street from swimming pool to Bokomo Road to accommodate future demand

Storm water

- Maintenance of Ilinge Lethu and Wesbank storm water system
- Channel under Voortrekker Street from the Post Office to Bokomo Road
- Retention structure in river north of the swimming pool
- Maintenance of Diep-and Platteklip rivers

Water

- Portions of the water network are outdated and needs to be upgraded
- Reservoir capacity should be increased for future development
- Secondary chlorination should be implemented at reservoirs

Streets

- Backlog of resealing programme, deterioration of road infrastructure
- Upgrading of Bokomo / Voortrekker Road intersection
- Upgrading of Piketberg / Voortrekker Road intersection

Electricity

- Replacement of obsolete substations and networks.
- No supply capacity available for any developments west of the N7 not yet implemented.
- New 132/11kV substation and 132kV transmission line to be committed to allow services approval of further developments west of the N7.

5 TOWN STATISTICS

The information in the section was obtained from the *Census 2011, Community Survey 2016 and Census 2022 of Statistics South Africa*.

Population Composition and Growth

Group	2011	%	2016	%	Annual Growth 2011-2016	2022	%	Annual Growth 2011-2022

90.7%	8.8%	0.1%	0.1%	0.0%	0.1%	0.3%

WARD 8 NEEDS

Most important needs prioritised

The following priorities were obtained from the Municipality's public participation proses during September and October 2022 and were revised in October and November 2023 as well in October and November 2024 at ward committee meetings. The ward committees used a prioritisation model (MS Excel) to determine the top 10 priorities of the ward based on the scoring of each ward committee member. Using the same Excel model, the top 10 priorities of all the wards was determined by totalling the individual ward scores. The top 10 ward committee priorities are shown in the tables below.

Swartland Municipality's functions

	Priority	Detail of Priority	Municipal service
1	Visible law enforcement	Visible law enforcement 24/7 (not only town areas but hotspot residential areas also)	Traffic and law enforcement
2	Disobedience of traffic rules	Act more effectively against vehicle drivers who disobey traffic rules	Traffic and law enforcement
3	More prepaid points to purchase electricity	More prepaid points to purchase electricity that stay open later (especially in outlying towns and Wesbank)	Electricity
4	Removal of illegal housing structures	Increasing influx of squatters (The Bos and along the river area)	Environmental management & protection
5	Preservation of heritage sites	Old infrastructure must be better preserved e.g. old houses, churches and other buildings that are unique to the area.	Environmental management & protection
6	Upgrading of Playpark in Flokkie street	Playpark in Flokkie Street must be upgraded	Parks
7	SMMEs Support	Tender processes must be explained to possible / potential small businesses. Everyone must be given an equal chance to provide services to Municipality. SMMEs must be mentored by the Chamber of Commerce. Tenders must be awarded to Swartland businesses and not outside the area.	Local economic development
8	Rehabilitation Centre	Alcohol and drug abuse in the community is a major crisis. Need more strict laws to be enforced. Need a rehabilitation centre.	Social development
9	Maintenance of infrastructure	Sidewalks, storm water drains, and open plots must be better maintained	Streets and storm water
10	Illegal littering	Address the illegal littering in Wesbank	Refuse removal

Western Cape Government's functions

	Priority	Detail of Priority	Provincial Department
1	Visible policing	Everyone must feel safe. Have visible policing during load shedding.	Community Safety
2	Youth Development	Children on the street during school hours	Education
3	Healthcare Access	Clinics are overcrowded. Sick people have to be turned away sometimes. Staff is inadequate.	Health
4	Social Upliftment	Shebeens / drug houses / gangsterism	Community Safety
5	Housing	Housing must be provided to the community	Housing
6	GAP housing	Affordable housing for the middle class	Housing
7	Skills development	Children need to be kept busy in a descent way. Uplift their skills.	Social development
8	Agricultural Land Protection	The government needs to limit usage changes on agricultural land. We need to maintain areas that are not over developed and crammed with houses. Help the farmers stay profitable. Support & stand up for our commercial farmers to ensure food safety for all.	Agriculture
9	Public transport	Public transport is basically non-existent. Railways systems not operating.	Transport
10	Tourism Development	Assistance to the local municipalities to grow and strengthen the tourism and hospitality sector in smaller towns. Many small hospitality and tourism businesses could benefit greatly with subsidies as well as skills development.	Economic Development and Tourism

WARD 10 NEEDS

Most important needs prioritised

The following priorities were obtained from the Municipality's public participation proses during September and October 2022 and were revised in October and November 2023 as well in October and November 2024 at ward committee meetings. The ward committees used a prioritisation model (MS Excel) to determine the top 10 priorities of the ward based on the scoring of each ward committee member. Using the same Excel model, the top 10 priorities of all the wards was determined by totalling the individual ward scores. The top 10 ward committee priorities are shown in the tables below.

Swartland Municipality functions

	Priority	Detail of Priority	Municipal service
1	Fire fighters response time	Reaction time of fire fighters and emergency service is slow in Malmesbury area	Firefighting and emergency services
2	Water Security	Water security in the summer months. Consider water reuse and coastal desalination	Water
3	Sustainable energy	Find a sustainable energy source	Electricity
4	Law enforcement presence	Law enforcement must be more visible	Traffic and law enforcement
5	Recycling	Get people to recycle 70% of their waste	Refuse removal
6	Substance abuse	Alcohol and drug abuse in the community is a major crisis. We need more strict laws to be enforced.	Social development
7	Illegal dumping	Illegal dumping in Wesbank	Refuse removal
8	Natural preservation	Natural areas are not properly preserved, potential for tourism not exploited	Environmental management & protection
9	Business development	An open environment for local, national and international businesses. Work in conjunction with the private sector to create more business development.	Local economic development
10	Upgrading of water infrastructure	Upgrading of waterpipes	Water

Western Cape Government functions

	Priority	Detail of Priority	Provincial Department
1	Healthcare access	Clinics are overcrowded. Sick people have to be turned away sometimes. Staff is inadequate.	Health
2	Community safety initiatives	Assist local community safety initiatives as much as possible	Community Safety
3	School overcrowding	Schools are overpopulated. Ratio of teacher to children is very high	Education
4	Truck traffic in town	R45 intersection with N7 urgently needed to eliminate truck traffic through town	Transport
5	Qualified teachers	Our education system calls for more qualified teachers to limit class sizes for more one to one teaching and more teacher on site duty during breaks and spring meetings to curb bullying among children	Education
6	Skills development	Children need to be kept busy in a descent way. To uplift their skills.	Social development
7	Housing access	Housing must first be given to the people of the area before people from other provinces get housing.	Housing
8	Skills development	Create opportunities for skills development of farms	Agriculture
9	Tourism development	Assistance to the local municipalities to grow and strengthen the tourism and hospitality sector in smaller towns. Many small hospitality and tourism businesses could benefit greatly with subsidies as well as skills development.	Economic Development and Tourism
10	Public transport	The municipality can maybe bring the My City bus service to Malmesbury.	Transport

WARD 11 NEEDS

Most important needs prioritised

The following priorities were obtained from the Municipality's public participation proses during September and October 2022 and were revised in October and November 2023 as well in October and November 2024 at ward committee meetings. The ward committees used a prioritisation model (MS Excel) to determine the top 10 priorities of the ward based on the scoring of each ward committee member. Using the same Excel model, the top 10 priorities of all the wards was determined by totalling the individual ward scores. The top 10 ward committee priorities are shown in the tables below.

Swartland Municipality functions

	Priority	Detail of Priority	Municipal service
1	High-mast lighting	Passageways in Wesbank needs lights (High mast lights at hotspots from Kanaal to Kanarie Street	Electricity

9	Crime prevention	Too many gangsters and shebeen houses	Community Safety
10	SAPS visibility	Visibility of SAPS at night	Community Safety

ANNEXURE 1: SPATIAL DEVELOPMENT FRAMEWORK PROPOSALS

The Swartland Spatial Development Framework outlines the guiding principles required to achieve the intended spatial form and offers a project timetable for implementing the SDF's suggestions into reality.

The goal of the Swartland Spatial Development Framework (SDF) is to sustainably direct growth and development in the municipal region of Swartland. Hence, future growth, development, and land use planning will adopt the spatial vision and principles to safeguard and build integrated, sustainable settlements and liveable environments as well as to promote economic and social prosperity.

Wards 8, 9, 10 and 11 comprise the urban areas of Malmesbury. The town is surrounded by hills of vineyards and wheat fields. The vibrant combination of colours and textures of the landscape contributes to the unique character of the Swartland. Malmesbury also serves as the connection point for four major transport routes; the N7 that connects Cape Town with the Northern Cape and Namibia, Main Road 25/1 that connects Ceres and Paarl with the N7, the R302 and Main Road 174 that connects Stellenbosch and Durbanville with Malmesbury and lastly Main Road 21/1 that connects Stellenbosch and Durbanville with the West Coast. The location of Malmesbury in terms of access and transportation routes as well as the town's proximity to other towns such as the Riebeek Valley, Darling, Yzerfontein, Moorreesburg, Vredenburg, Langebaan and Piketberg are contributing factors to the identification of Malmesbury as the regional service centre of the Swartland

Malmesbury
