1. OUR VISION FOR THE FUTURE

(a) Our dream of a desired future for the Swartland

During the Strategy Workshop with Council and management held from 23-25 November 2022, participants were divided into five groups. Each group was tasked with envisioning their dream of a desired future for Swartland. The desired future described below is a consolidation of the work generated by the five groups.

COMMUNITY SAFETY AND WELLBEING

We dream of a Swartland that is crime free. An area where people feel safe and don't get robbed. Where everyone can move freely without fear.

We see an area where children can safely play in streets and parks. Where they can safely walk or ride by bicycle to school. Where there is a culture of "my child is your child".

We see communities that are law-abiding. Where the causes of criminality are eradicated. Where there is an effective police force to provide the necessary protection.

We dream of a Swartland that is rich in social and cultural activities. Where all our communities live together in peace, harmony, love and compassion, taking responsibility for their actions. An environment where people respect each other, have opportunities to grow and develop and contribute to the economy.

We see a quality and affordable education system that moved beyond the traditional curriculum and can cater for the future educational needs. We see an area where proper healthcare is affordable and accessible for all residents.

We see open spaces, hiking trails and cycle tracks that promote an active and healthy lifestyle.

We see "Ubuntu" lived and practised by all to its fullest extent in Swartland.

ECONOMIC TRANSFORMATION

We dream of a Swartland where the economy has grown and attracted private and global investment. Where everyone has a job and where economic growth is sustained through education, skills development and entrepreneurial opportunities.

We see an abundance of vendors and entrepreneurs. No loitering and beggars on the streets. Small, medium and micro enterprises (SMMEs) are mentored to be sustainable.

We see skills transfer centres in all our areas and also on-line.

QUALITY AND RELIABLE SERVICES

We dream of a Swartland where everyone has access to excellent and sustainable services. Services that are provided at affordable rates and upgraded continuously. We see innovative ideas becoming a reality and the smarter management of resources. We see a community that is prepared to be co-responsible for the state of our infrastructure.

We see an integrated transport and effective commuting network with less vehicles on our streets and therefore less traffic congestion.

A HEALTHY AND SUSTAINABLE ENVIRONMENT

We dream of a Swartland where the biodiversity and wildlife are protected. Where the skies are blue (no pollution), the air is clean (no unhealthy emissions) and the environment is green (proper environmental conservation and improved health of the environment).

We dream of a Swartland where every citizen has access to safe, secure and affordable housing. Where the government and private sector work together to ensure that there is adequate housing for all and that those who are currently living in substandard housing are provided with better options.

We see a future where informal settlements are transformed into well-planned, sustainable communities with access to clean water, sanitation, electricity, and other basic services. Where these communities are designed with input from the residents themselves to ensure that their needs and aspirations are met.

A CONNECTED AND INNOVATIVE LOCAL GOVERNMENT

We dream of a world class Swartland that is globally connected. Where technology is utilised to make life easier to communicate commute and interact. Where every home has an optic fibre connection.

We see a Municipality that embraces innovation; with enhanced connectivity and collaboration, that can contribute to a prosperous and sustainable future.

We dream of a Municipality that leverages technology to better serve the needs of the community.

We see a Swartland where the smart city concept is used to increase operational efficiency, share information with the public and improve both the quality of government services and citizen welfare.

(b) Our future Swartland

We dream of Swartland 2040 that is valued for -

- being safe, healthy and prosperous;
- providing good governance, quality services and the ease of doing business with; and
- leading in technological innovation and environmental responsibility.

(c) Vision

Swartland forward-thinking 2040 - where people can live their dreams

Swartland vooruitdenkend 2040 - waar mense hul drome kan uitleef

(d) Strategic goals

- Community safety and wellbeing
- Economic transformation
- Quality and reliable services
- A healthy and sustainable environment
- A connected and innovative local government

2. INTRODUCTION

(a) General

Area-based planning is a component to the integrated development plan (IDP) process that focuses and zooms in on communities. Settlements and wards represent communities in this sense. As wards are sometimes marked in a way that splits regions that in actuality work as a unit, Swartland decided to propose a different technique that prioritises rational geographical areas while also taking ward planning into account so that wards are not neglected. To do this, each area plan integrates a number of wards.

The following five planning areas were identified:

- North: Moorreesburg, Koringberg and Ruststasie (Wards 1 and 2);
- East: Riebeek West, Riebeek Kasteel and Ongegund (Wards 3 and 12);
- West: Darling and Yzerfontein (Wards 5 and 6);
- South: Abbotsdale, Chatsworth, Riverlands and Kalbaskraal (Wards 4 and 7);
- Central: Malmesbury (Wards 8, 9, 10 and 11 and small portions of wards 4, 7 and 12).

As such, it is a strategy for addressing integrated development planning at the sub-municipal level. As a result, five planning areas exist, each with its own Area Plan document. Four of the five layouts cover two wards each, while Malmesbury town covers four.

The significance of wards and ward committees is addressed in the second part of each Area Plan. It also includes community feedback and the outcomes of public engagements held in particular wards.

(b) Structure of document

Information is presented per town and ward when addressing planning and community participation at the local level (as mentioned in the previous paragraph).

This might be challenging since it disrupts the normal flow of analysis and community involvement towards initiatives/goals. To keep things clear, anything that can be linked to a town is in the town part, and everything that can be linked to a ward approach is in the ward section.

(c) Compilation of the area plans

The Municipality, in collaboration with the ward committees, produces the area plans. Every year, the 12 ward committees meet to establish their concerns and top 10 priorities, or to reprioritise the priorities if necessary due to changing circumstances.

Ward committees identify the primary priorities of the relevant wards in relation to the five IDP strategic goals.

The Municipality then captures the priorities established during the sessions and returns them to the individual ward committees to confirm the ten key goals mentioned in the area plan.

The area plans are finished by the end of May each year and approved by Council together with the IDP.

(d) The IDP and Area Plans

The five area plans include the following:

- an understanding of social diversity in the community, the assets, vulnerabilities and preferences of these different social groups;
- an analysis of the services available to these groups, as well as the strengths, weaknesses, opportunities and threats facing the community;
- a consensus on priorities for the relevant wards; and
- identification of projects for the IDP.

Area plans assist in assuring that the IDP is more focused and relevant to the needs of all communities, including the most vulnerable. Ward committees can use area plans as a methodical planning and execution tool to carry out their functions and obligations. They serve as the foundation for conversation between the Municipality and ward committees on the identification of priorities and budget requests, and ward committees will utilise them for continued monitoring and assessment throughout the year.

Area plans are an integral aspect of the IDP and contain information that is utilised to define the Municipality's long-term strategy. Yet, the material is detailed and not repeated in the IDP.

3. SUMMARY OF DEMOGRAPHIC DATA

The information in the section was obtained from the Western Cape Government's 2024 Socio-economic Profile (SEP) Report and Census 2022.

4. TOWNS IN THE AREA

(a) Moorreesburg

HISTORICAL BACKGROUND

Moorreesburg originated as a result of the establishment of the DR Church in the last half of the 19th century. It is a town situated in the Swartland region of the Western Cape province of South Africa. The earliest history of the church up to 1882 was interwoven with the history and initial development of the town. The town is named after one of the former ministers of the Swartland congregation, namely Rev. J. C. Le Fèvre Moorrees.

In 1882, Lord Milner granted town status and Moorreesburg's first town council was elected. Besides the central town area, development also takes place in four other areas namely:

- Parts of the town Neulfontein B (currently known as the farm Tevrede) were developed and are known as Steynsburg. It is the area between Park Street and Uitsig Street;
- In 1920, the area between Smuts Street and Uitsig Street was developed. This area is known as Smutsville;
- On the northern side of Lang Street and the western side of Reservoir Street, another area is developed on a section of the farm Klipvlei;
- The town area of Hooikraal was laid out in 1915 and divided into 1234 erven, which were sold at a cheaper price than the town erven. In 1915, the land north of the river at Hooikraal was incorporated.

During the early 20th century, Moorreesburg was an important hub for the region's agricultural industry. The town was situated in the heart of the wheat belt, and many wheat farmers brought their crops to Moorreesburg for processing and transportation to markets in Cape Town and other parts of the country. Moorreesburg was also an important railway junction, with several railway lines converging in the town. The railway played a vital role in the town's economy, providing transportation for goods and passengers. Today, Moorreesburg remains an important agricultural hub, with wheat, wine grapes, and other crops grown in the area.

DEVELOPMENT PERSPECTIVE

The main function of the town is that of an agricultural service centre (central place town), in the heart of the wheat producing Swartland district.

Light industries are beginning to play an increasingly important role in the town. The role of the Swartland Group (producing wooden window frames and doors), Skaarland (ploughs), Swartland Cement and other agri-related industries (dog food and canola oil), should not be underestimated in its impact on the local economy of the region. More light industries related to the agricultural function should be attracted. Moorreesburg is the seat of the West Coast District Municipality (WCDM).

Malmesbury and Piketberg and the stagnation of agricultural production due to drought and the strong rand currency (which makes imports of corn cheaper than producing it locally).

Water availability may be a limiting factor for development as an agriculture centre. The possibility to diversify agricultural activities in the region must be investigated. The present dominance of agriculture around which the town economy revolves makes the economic base vulnerable. This could be countered by a specific focus on agriculture/wheat related tourism.

(b) KORINGBERG

HISTORICAL BACKGROUND

Koringberg is a typical example of a town that developed from a church and a railway siding. The town was originally established in 1923 with the church being built on the farm Brakfontein. It was initially known as Warren's Camp after the railway station. The name Koringberg however, refers to the prominent hill behind the village which overlooks the wheat fields. The town obtained municipal status in 1975 but lost it afterwards. Today Koringberg is the northern-most settlement of the Swartland Municipal Area.

DEVELOPMENT PERSPECTIVE

Koringberg developed as an agricultural service centre but currently functions as a residential settlement, which, to a large extent accommodates farm workers of the surrounding rural areas. To an extent, the cultivation of wheat was replaced with the production of grapes for the export market. The farm Broodkraal provides work to 2000 labourers, the majority of whom live in Koringberg. Some of the farm residents are of the opinion that Koringberg has growth potential as a retirement village and a rural breakaway resort. Various artists and retirees have already settled down here.

Koringberg should, at this stage, qualify primarily for major social capital investment rather than for fixed infrastructural investment. In this way, the capacity of the town's community and their social well-being could be uplifted more effectively.

The town is located a few kilometres off the N7 route, and its proximity to Moorreesburg contributes to its functional role as a low-order rural settlement. In reality Koringberg's development profile promises very little growth potential. The only positive development components the settlement reveals are economic change and regional vitality, which are misleading indicators on account of the statistical fallacy produced by relatively large percentages on small census numbers.

(c) Service backlogs

WARDS 1 AND 2	
KORINGBERG	MOORREESBURG
Sewerage <ul style="list-style-type: none"> ▪ Sewer reticulation network poorly developed and must be extended. ▪ Waste Water Treatment Works is overloaded and must be upgraded. 	Sewerage <ul style="list-style-type: none"> ▪ Frequent localised blockages in the sewer collection system due to foreign objects.
Storm water <ul style="list-style-type: none"> ▪ No formal piped storm water drainage system. ▪ There are many unlined channels which causes erosion and maintenance problems. 	Storm water <ul style="list-style-type: none"> ▪ Maintenance of the No-Go River. ▪ Regular blockages and flooding in Rosenhof.
Water <ul style="list-style-type: none"> ▪ Poorly developed network, small diameter pipes, low pressure and flow condition and open ring mains. ▪ Sections of the water reticulation network are obsolete and must be upgraded. ▪ Secondary chlorination at reservoirs must be implemented. 	Water <ul style="list-style-type: none"> ▪ Obsolete infrastructure, pipe breakages, leaking valves and leaking hydrants. ▪ Poorly developed network, shortage in shut-off valves. ▪ Secondary chlorination at reservoirs must be implemented.
Streets <ul style="list-style-type: none"> ▪ Backlog resealing programme coupled with deterioration of road infrastructure. ▪ Many roads are not constructed with kerbstone and formal sidewalks. 	Streets and traffic <ul style="list-style-type: none"> ▪ Numerous problems are encountered with safe access to the N7 from both entrances to town, particularly the southern entrance. During winter months problems with bad vision is experience due to fog. ▪ Backlog of street resealing programme, deterioration of road infrastructure
Electricity <ul style="list-style-type: none"> ▪ Eskom area of supply. ▪ Street lighting inadequate. 	Electricity <ul style="list-style-type: none"> ▪ Old and Obsolete mini-substations and oil filled switchgear. The units are being replaced on a priority basis within budget constraints.

5. TOWN STATISTICS

The information in the section was obtained from the *Census 2011, Community Survey 2016 and Census 2022 of Statistics South Africa*.

91.5%	6.4%	1.2%	0.1%	0.1%	0.0%	0.7%

WARD 1 NEEDS

Most important needs prioritised

The following priorities were obtained from the Municipality's public participation process during September and October 2022 and were revised in October and November 2023 as well as in October and November 2024 at ward committee meetings. The ward committees used a prioritisation model (MS Excel) to determine the top ten priorities of the ward based on the scoring of each ward committee member. Using the same Excel model, the top ten priorities of all the wards were determined by totalling the individual ward scores. The top ten ward committee priorities are shown in the tables below.

Swartland Municipality functions

	Priority	Detail	Municipal service
1	Fire fighting services	24-hour professional firefighting service in Moorreesburg	Firefighting and emergency services
2	Investment promotions	Attract investment to Moorreesburg to increase job opportunities	Local economic development
3	Cemeteries	Create area to the right of and next to current squatter camps for cemetery	Parks and recreation
4	Traffic and road safety challenges	Trucks drive through the town at night to avoid the weighbridge. Vehicles use main street as a racing track	Traffic and law enforcement
5	Pool safety and enclosure	Wall around the swimming pool needs to be completed	Parks and recreation
6	Online pre-paid electricity service	Ability to buy pre-paid electricity online	Electricity
7	Economic growth and development	Economic growth and development	Local economic development
8	Community safety	Safety at sport functions	Sports fields
9	New street lights	More streetlights required in Hooikraal	Street lights
10	Sport facility refurbishment	Upgrading of sport facilities	Sport fields

Western Cape Government functions

	Priority	Detail	Provincial Department
1	Community safety	Gang violence	Community Safety
2	Full-time emergency services	A 24-hour emergency service centre	Health
3	Expanding sustainable affordable housing	Build more RDP houses for people and prohibit people to rent out their houses	Housing
4	Public transport	Public transport from Moorreesburg to Cape Town	Transport
5	Law enforcement challenges	Hooikraal is currently a crime hotspot. Police have one vehicle for the whole of Moorreesburg, and they are understaffed. The landlines at the police station do not work during load shedding	Community Safety / SAPS
6	Health care staffing challenges	Appoint more staff at the clinics	Health
7	Shelter for vulnerable individuals	A night shelter to cater for the growing homelessness problem	Social development
8	Skills development	A skills development centre	Education
9	Investment promotions	Assist with the promotion / marketing of the town	Economic Development and Tourism
10	Health care facilities	A public hospital	Health

(b) WARD 2 (Moorreesburg East)

WARD 2 DESCRIPTION:

Southern and eastern parts of Moorreesburg.

5	Full-time firefighting services	24-hour professional firefighting service in Moorreesburg	Firefighting and emergency services
6	Transforming public spaces	Upgrading of public toilets and littering	Parks and recreation
7	Shelters for vulnerable individuals	A safe shelter	Social development
8	Clean public spaces	Littering in town, cleaning / repair of streets and pavements	Refuse removal
9	Empowering businesses	Rosenhof - Several underdeveloped businesses, high unemployment levels among youth and adults	Local economic development
10	Affordable municipal services	High water tariffs	Water

Western Cape Government functions

	Priority	Detail	Municipal service
1	Emergency services	A 24 hour emergency service centre	Health
2	Sustainable affordable housing	Housing for backyard dwellers	Housing
3	Promoting education retention	Take action to address the issue of school dropouts	Education
4	Skills development	Skills development centre	Education
5	Community safety staffing challenges	Lack of policing	Community Safety
6	Health care services staffing challenges	Appoint more staff at the clinics	Health
7	Health care transportation to outside areas	Lack of transportation for individuals requiring healthcare access in Cape Town without means to travel from Moorreesburg	Health
8	Health care access through transportation	Transport to clinics for elderly and disabled people	Health
9	Dual medium instruction at primary school	Primary school to offer instruction in both English and Afrikaans	Education
10	Public hospital	Need a Public hospital in Moorreesburg as the nearest hospital is Malmesbury	Health

ANNEXURE 1: SPATIAL DEVELOPMENT FRAMEWORK PROPOSALS

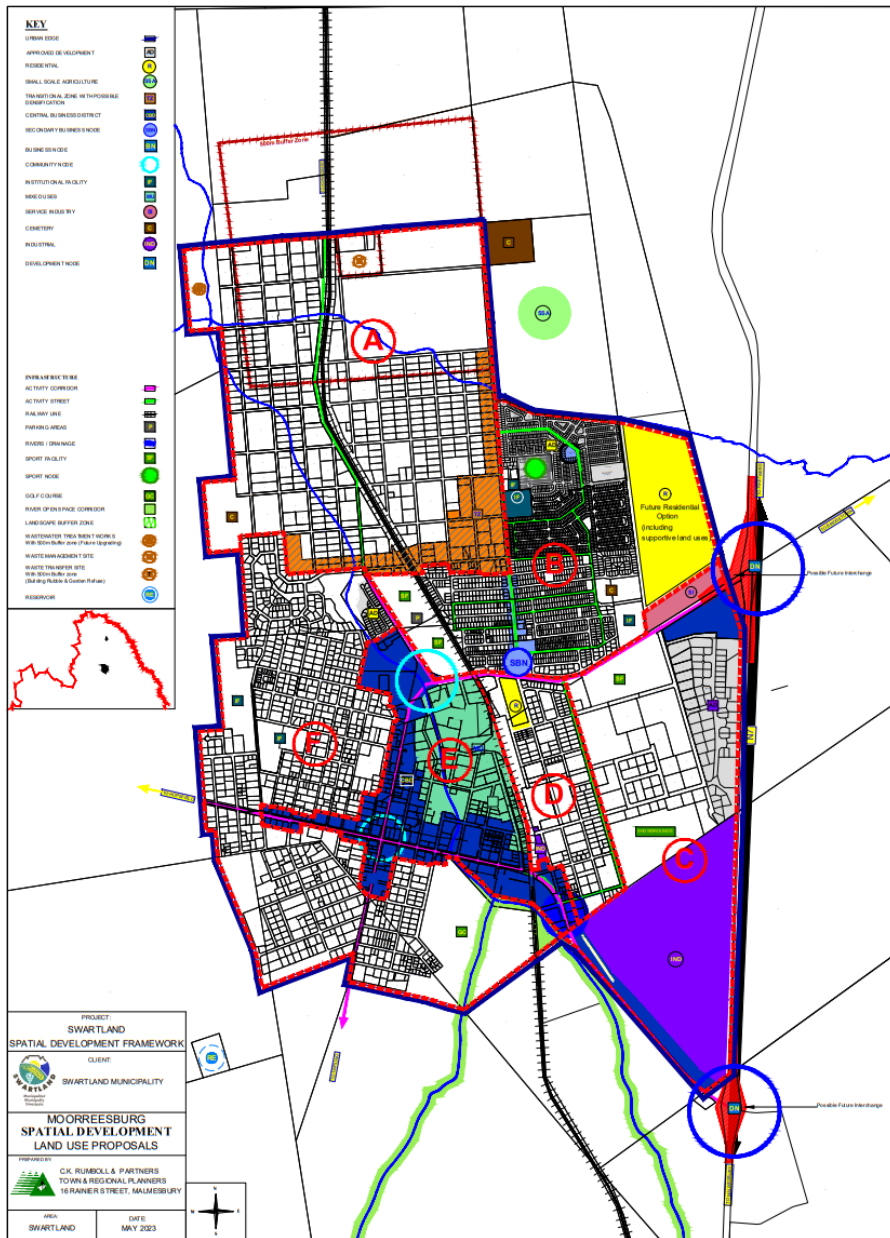

The Swartland Spatial Development Framework outlines the guiding principles required to achieve the intended spatial form and offers a project timetable for implementing the SDF's suggestions into reality.

The goal of the Swartland Spatial Development Framework (SDF) is to sustainably direct growth and development in the municipal region of Swartland. Hence, future growth, development, and land use planning will adopt the spatial vision and principles to safeguard and build integrated, sustainable settlements and liveable environments as well as to promote economic and social prosperity.

Moorreesburg is centrally located in the northern part of the Swartland and is an important agricultural service centre to the extensive surrounding agricultural production area. Settled amongst rolling hills in an extensive agriculturally productive area, Koringberg is the most northerly-located urban settlement in the Swartland.
